

# Bpure Series Tube/Boat Cleaning Tool

## System Overview

Bpure series of tube/boat cleaning tools provides customized cleaning (immersion or spray) of critical diffusion furnace components.

<b>Applicable Parts:</b>	200 mm and 300 mm Tubes and Boats
<b>Applicable Materials:</b>	Quartz, SiC
<b>Technology Markets:</b>	Analog IC, Digital IC, Power IC, MEMS, Advanced Packaging

Bpure TC2000A Series

Bpure TC3000A Series

## Processes

- Cleaning of quartz tubes, quartz/SiC boats
- Can also be used to clean other quartz materials, such as pedestals, caps, torches, quartz plates, ignition guns, heat preservation barrels, etc.

## Production Advantages

- Fully-automated process control
- Enclosed design to improve working environment and effectively guarantee operators' safety
- High stability, uptime  $\geq 99\%$ , lower maintenance costs
- Recipe editor is flexible and convenient, support parallel jobs
- Suitable for a variety of sizes of parts cleaning
