

Bpure Series Tube/Boat Cleaning Tool

System Overview

Bpure series of tube/boat cleaning tools provides customized cleaning (immersion or spray) of critical diffusion furnace components.

Applicable Parts:	200 mm and 300 mm Tubes and Boats
Applicable Materials:	Quartz, SiC
Technology Markets:	Analog IC, Digital IC, Power IC, MEMS, Advanced Packaging

Bpure Horizontal Quartz Tube &
Quartz Boat Cleaner—TC2000A Series

Bpure Vertical Quartz Tube &
Boat Cleaner—VTC3030A

Processes

- Cleaning of quartz tubes, quartz/SiC boats
- Can also be used to clean other quartz materials, such as pedestals, caps, torches, quartz plates, ignition guns, heat preservation barrels, etc.

Production Advantages

- Fully-automated process control
- Enclosed design to improve working environment and effectively guarantee operators' safety
- High stability, uptime $\geq 99\%$, lower maintenance costs
- Recipe editor is flexible and convenient, support parallel jobs
- Suitable for a variety of sizes of parts cleaning

**NAURA Akrion can also provide customized parts cleaners, ovens, and stockers.*
